

SAURABH SAMBHE

Full Stack Developer | Angular · .NET · Gen AI (RAG, Agents)
Mumbai, India | +91-7499328730 | saurabhsambhe02@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3.5 years of experience building and scaling a global digital logistics platform (ECU360) used across 100+ countries. Specialized in Angular and .NET with MS SQL, with additional hands-on experience in the MERN stack, Next.js, and building production Gen AI applications (RAG, agentic tool calling, evals).

TECHNICAL SKILLS

Frontend: Angular, React.js, Next.js, TypeScript, JavaScript (ES6+), RxJS, Redux, Tailwind CSS, HTML5, CSS3

Backend: .NET, Node.js, Express.js, FastAPI, Python, APIs

AI / GenAI: RAG pipelines, LLM agents & tool calling, vector search (pgvector), embeddings, prompt engineering, LLM evals, OpenAI-compatible APIs (Groq, Anthropic)

Databases: MS SQL, MySQL, MongoDB, PostgreSQL (pgvector), SQL query optimization

DevOps & Cloud: Azure DevOps (CI/CD pipelines), Azure Blob Storage, Git, GitHub, Linux

Other: Agile/Scrum, AI-assisted development (GitHub Copilot, Claude), C, C++

PROFESSIONAL EXPERIENCE

Allcargo ECU Limited (ECU Worldwide)

Mumbai, India

Global digital logistics platform (ECU360) providing freight forwarding and supply chain services in 100+ countries.

Senior Full Stack Developer

June 2024 – Present

- Led UI/UX development of the **Sailing Schedule and Quote modules** — two of the platform's highest-traffic features — serving customers in 100+ countries; improved usability and responsiveness.
- Designed and shipped a **dynamic banner configuration system** using Angular services and role-based logic to personalize content by user location and access level, increasing banner engagement by 20%.
- Enhanced the **Trucking Instruction module (Phase 2)** to support multi-location freight quoting with advanced reactive form validations, reusable modular components, and .NET backend integration.
- Reduced data retrieval time by **80%** for the ICOPS module by optimizing MS SQL queries and introducing client-side filtering with RxJS, sustaining performance under peak traffic.
- Reviewed pull requests and mentored 2 junior developers on Angular best practices, component design, and code quality standards.

Graduate Engineer Trainee (Full Stack)

June 2023 – May 2024

- Resolved **125+ production issues** through debugging, log analysis, and patch releases deployed via Azure DevOps CI/CD pipelines, improving platform stability for global users.
- Delivered 5 major value propositions in collaboration with the product team, shipping customer-facing feature enhancements across the platform.

Development Intern

January 2023 – May 2023

- Integrated an **Amazon Lex chatbot** into the ECU360 platform, streamlining user interaction with logistics services.
- Implemented **Azure Blob Storage** for files and images on ECU360, offloading static assets and improving page-load performance by 90%.

PROJECTS

CargoMind — Agentic RAG for Logistics Documents

[GitHub](#) | [Live Demo](#)

- Built and deployed a document-intelligence app where users upload freight quotes, invoices, and contracts and get answers with clickable citations; semantic search over PDF chunks embedded (bge-small, 384-dim) into PostgreSQL + pgvector.
- Implemented a framework-free LLM agent loop (Llama 3.3 70B, tool calling) with document search and a safe AST-based calculator tool; streamed live reasoning steps and cited answers to a Next.js UI over SSE.
- Designed a 21-question eval suite measuring retrieval hit-rate@5 and answer accuracy across five failure-mode categories incl. calculations and unanswerable queries; improved reliability via failure analysis and rate-limit backoff.
- Tech:** FastAPI, Next.js 14, TypeScript, PostgreSQL + pgvector (Neon), sentence-transformers, Groq API, SSE · deployed on Render + Vercel

Crypto Factory — Real-Time Cryptocurrency Tracker

[GitHub](#)

- Full-stack crypto tracker polling the CoinGecko API with MongoDB persistence — Next.js, TypeScript, Express, Redux.

EDUCATION

B.Tech, Computer Science Engineering — CGPA 8.24

Aug 2019 – May 2023

Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded, India

ACHIEVEMENTS & CERTIFICATIONS

- 500+ problems solved (LeetCode, Codeforces, CodeChef) | SQL Advanced — HackerRank | RAG — Udemy | JLPT N5
